PRANAV JAGADEESH IBM18 CS071 PROGRAM-4

Observations :- Configuring default Route to Router

   Connect PC$_0$ and PC$_1$ to Switch - PT - 0.

   Connect PC$_2$ and PC$_3$ to Switch - PT - 1.

   Connect Switch - PT - 0 to Router 0.

   Connect Switch - PT - 1 to Router 2.

   Connect Router 0 and Router 2 to Router 1.

All the 4 PC's are configured with IP address and gateway.

The Routers are also configured and the network is

established using CLI.

Messages are sent from and across PC's connected

through the Ping command.

PDU messages can also be sent and acknowledged.

Thus the experiment is verified.
